1 About this release

This document describes a new **stable** release of the MT Software Suite specific for Awinda / MTw2 (DOT Pro) use cases.

2 Deliverables

Table 1: Deliverables

Release component	Product applicability	New version	Previous versions	Comments
MT Software Suite for Awinda	Awinda DK / DOT Pro <ul style="list-style-type: none">Awinda station/dongle (FW: 4.6.0)MTw2 trackers (FW: 4.6.0)	New stable: 2022.2	Last beta: 2019.1.1 Last stable: 4.6.0 (2016)	<ul style="list-style-type: none">Support for extended deviceIDs (additional range) for MTw2 trackersbug fixes and improvements

3 Features, improvements and bug fixes

This section details the list of issues that are contained in this release as compared to the last stable release.

Table 2 List of features, bug fixes, and improvements

Type	Reference	Comments
Features		Support extended (=additional range) of Device IDs for MTw2 trackers
Improvements		New version of GUI framework
Bugs		Several bugs were fixed. For a complete list, see: https://mtidocs.xsens.com/release-notes-change-logs

4 MTSS System Requirements

The MT Software Suite is designed for both Windows and Linux; the following system setup is recommended to properly run the software:

- Windows 10 64-bit (or higher) or Linux Ubuntu LTS 18.04 64-bit (or higher) (no official support anymore for Windows 7/8 or 32-bit platforms)
- Intel® Pentium® or AMD® processor, 1 GHz (minimum) Pentium® Haswell (gen 4) or AMD Athlon® Carrizo or newer (recommended)
- USB port (1.1 or higher) or standard PC serial COM-port (RS-232)
- Graphics card with 3D hardware acceleration and OpenGL support. Contact your graphics card manufacturer to ensure your graphics card drivers are up to date. The recommended screen resolution (height) is 900 pixels or higher.
